11. Caution

- ◆ You can back up your wallet using a Recovery sheet in another KeyWallet. If you lose your KeyWallet, you can safely manage your assets by using KeyWallet backed up.
- ◆ To use KeyWallet, you must enter the PIN number that was set when you first created your wallet. If you enter the wrong password 10 times, your wallet will be locked. If your wallet is locked, you can not use your wallet. If you want to use your wallet, you need to initialize and restore your wallet using the recovery word and Passphrase that you filled out the Recovery sheet.
- ◆ A recovery word can only be seen once when creating your first wallet. When you create a wallet, be sure to fill in the recovery word exactly on the Recovery sheet to avoid forgetting the recovery word. Passphrase can not be reconfirmed as well, so it is important to fill out the Recovery sheet correctly. If you lose the recovery word or the Passphrase, you will not be able to recover your wallet correctly.
- ◆ We recommend that you use Recovery sheet to check that your wallet is recovered properly after creating your wallet.
- ◆ When you initialize your wallet, you can recover your balance by recovering your wallet correctly using the Recovery sheet.
- ◆ Keep the recovery sheet in a safe place that no one else can see. If you do not have a recovery sheet, you will not be able to recover your wallet.
- ◆ The manufacturer is not responsible for damage caused by Recovery sheet management Carelessness and lose.
- ◆ When you reset your wallet, All your private keys and coin data will be removed. You must have recovery words to recover your wallet after initialization
